**BASSETITE**

Fe$^{2+}$(UO$_2$)$_2$(PO$_4$)$_2$ • 8 H$_2$O

A rare supergene uranium mineral. Northern Peninsula.

**Iron County:** Reported by Vickers (1956b) with other supergene uranium minerals, various sulfides, and pitchblende at the Buck iron mine.

**Marquette County:** Greens Creek slate trench, NE ¼ SE ¼ section 24, T46N, R27W: Bassette occurs in layers of quartzite associated with metatorbernite (q.v.), dickite (or kaolinite?), pyrite and malachite (Kalliokoski, 1976).
