

## CLAUSTHALITE

PbSe

Clausthalite is an uncommon mineral found in certain hydrothermal vein deposits usually in association with other selenides. It is the first selenide mineral to be identified from Michigan. Northern Peninsula.

**Menominee County:** Aquila Resources, Inc. Back 40 Project, sections 1 and 12, T35N, R29W: As a minor constituent in oxidized massive sulfide (gossan) (Quigley and Mahin, 2008).
