

VOLBORTHITE

A rare supergene mineral found in some oxidized copper and uranium deposits. Northern Peninsula.

Baraga County: Huron River prospect, NW ¼ NW ¼ section 1, T51N, R30W: Volborthite occurs with metatyuyamunite, calcite, and “pitchblende” in a brecciated quartz vein (thrust fault) exposed in the bank of the Huron River (East branch) near, and upstream from the falls (Kalliokoski, 1976).
